CORPORATE OVERVIEW

Bevy Technologies LLC provides expert software architecture, application modernization, and digital transformation services to commercial and government clients. With over 13 years of enterprise software engineering experience, we specialize in delivering rapid, secure, and accessible mobile/web solutions on a Firm-Fixed-Price (FFP) basis.

CORE COMPETENCIES

- **Cross-Platform Mobile Development:** Production React Native (iOS & Android) apps with native accessibility, offline capabilities, and simplified UI modes for diverse demographics.
- **Modern Web Applications & Dashboards:** Scalable React.js and Node.js microservices engineered in automated monorepo pipelines (Nx/Docker).
- **AWS Cloud Infrastructure & Security:** Enterprise AWS deployment featuring multi-AZ fault tolerance, end-to-end encryption, and HIPAA-aligned data segregation.
- **Responsible AI Integration:** Deterministic AI triage, natural language processing, and automated fail-safes under strict zero data-retention policies.
- **Accessibility & Compliance:** Strict Section 508 and WCAG 2.1 AA compliant UI design, automated auditing, and continuous compliance integration.

PAST PERFORMANCE & COMMERCIAL EXPERIENCE

- **Connect Yonkers Seniors Platform (City of Yonkers RFP-561):** Proposed solution architecture for an accessible AI-driven mobile/web application serving seniors 60+ and caregivers, featuring multi-lingual AI support and real-time scheduling.
- **Fortune 10 Healthcare & Pharmacy Systems:** Spearheaded the modernization of legacy enterprise systems, moving fragmented source control into a centralized Git-based Nx monorepo and designing automated CI/CD pipelines to secure sensitive healthcare data.
- **Global Media & Entertainment Platforms:** Architected scalable tools that enhanced QA automation and boosted developer productivity. Led Agile engineering teams through the full SDLC to successfully launch high-visibility streaming applications.

CODES & IDENTIFIERS

Primary NAICS

- **541511:** Custom Computer Programming

Secondary NAICS

- **541512:** Computer Systems Design
- **541519:** Other Computer Related Services
- **541513:** Computer Facilities Management
- **518210:** Computing Infrastructure & Web Hosting

Product Service Codes (PSC)

- **DA01:** IT and Telecom - Business Application/App Development
- **D302:** IT and Telecom - Systems Development

KEY DIFFERENTIATORS

- **13+ Years Enterprise Architecture:** Proven engineering background in complex healthcare and high-concurrency environments.
- **Firm-Fixed-Price Predictability:** High-velocity modernization projects delivered on transparent, milestone-driven budgets.
- **Security & Privacy First:** Built-in end-to-end field encryption with zero third-party vendor lock-in.
- **Agile & Direct:** Direct access to Principal Software Architects without administrative bloat.
